

Stacker door - 3 Track Sliding Door Head fixing detail

Fixing through jambliner to timber structure
Stainless steel screw fixing through PVC-U frames

Note: Cladding & flashing details not shown

Stacker door - 3 Track Sliding Door Sill rebate detail

Rebate Table 5.7

Floor Type	Thickness (mm)	Rebate Height H (mm)	Rebate Width W (mm) (from back of the flange)
Carpet	20	26	130
Tile	13	33	130
Timber	22	24	130

- Note:** Rebate width is calculated from the back of the flange. For cavity construction, that is the outside of cladding. For direct fix, that is Min 5mm out of cladding.
- Note:** The aluminium angle shall be fixed to bottom frame onsite after checking the bottom frame rebate from concrete slab.
- Note:** The bottom frame needs to be packed level from end to end so weight is well supported by the structure.
